

Extending Our Reach and Making a Difference

Fresh Water

Our Continued Focus - Well Installation/Maintenance -

Safe Water Buckets - \$6,000

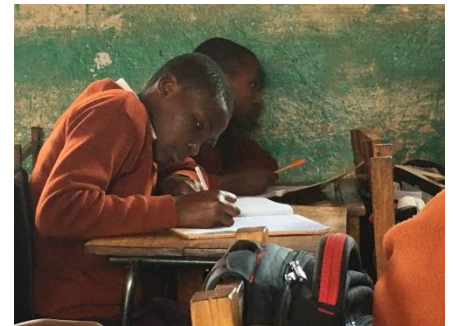

Clean water is a scarce resource in many areas in East Africa. Women and children, usually young girls, are often walking for miles to bring water to their families. We have installed 43 wells in this area, many by schools, and are now helping communities maintain this investment. We are also initiating a safe water program, providing buckets with lids and valves to better insure safe water handling and storage and to help prevent water-borne disease.

Education

Textbooks and Supplies - \$12,500

Most of the textbooks in the school's library are old and outdated. Additionally a new curriculum places increased emphasis on science. Science-based learning materials are either not available or severely limited. New texts will replace old textbooks and science lab supplies will be purchased incrementally as funding allows.

Barnabas Chavala Scholarship Fund - \$3,000

Most secondary schools in Tanzania are private requiring students to pay tuition, room and board as well as for uniforms and school supplies. School costs provide another barrier for young women who are expected to gather wood, water and take care of their siblings. Barnabas Chavala has been an inspiring educator well known and respected throughout the region. We are proud to continue to support a scholarship fund in his name to help young women pursue the dream of a quality education.

Healthcare

Laboratory Equipment and Medical Supplies - Pomerini Health Dispensary - \$10,000

Addressing the health needs in this rural area presents a tremendous challenge. Lack of access to quality laboratory services contributes to misdiagnosis and compromised patient care. We funded a recent dispensary renovation which enabled us to address a variety of clinical needs, however, essential laboratory equipment and medical supplies remain an urgent need.

Our fundraising goals for 2018 total \$31,500... Won't you help?
